introduction

At POLSTAR, we pride ourselves on offering products that stand out in terms of quality, affordability, and attractive designs. Our top priority is customer satisfaction, ensuring short production times and swift, secure deliveries to exceed your expectations.

In our extensive 2023 Catalog, we present a wide range of new patterns inspired by prevailing trends and customer preferences. Whether you adore traditional styles or favor modern and minimalist designs, our rich collection has something suitable for everyone..

Discover the exquisite craftsmanship of our door models, divided into two distinct collections: Horizon and Galaxy. The Horizon line pays homage to great explorers who pushed boundaries and achieved remarkable goals. Similarly, the Galaxy collection draws inspiration from stars, planets, and constellations, reflecting both the beauty and durability we prioritize.

When you choose POLSTAR, you choose more than just doors. You choose lasting quality, exceptional aesthetics, and a company dedicated to your satisfaction.

Explore our extensive range of accessories and various model configurations to find the perfect exterior doors for your home. Experience the blend of style, functionality, and longevity that POLSTAR offers.

Visit our website <https://polstar.pl/en/> to browse our catalog and place your order today. Transform your home's entrance with the finest exterior doors from POLSTAR.

Wishing you a successful shopping and the utmost satisfaction with the use of our products.

Transom windows are available only in Aluthermo and Aluthermo Lock packages with a choice of glazing: reflex, transparent, one-way mirror, and milky decormat. It is possible to order side and top transom windows in non-standard sizes. The cost of a transom window is the amount of the larger dimension + PLN 60 net for each transom window. The size increment is every 10 mm.

Aluthermo Lock cross section

- A** the door leaf skin is made of steel sheet protected against corrosion and covered with a high-quality film resistant to UV radiation and atmospheric conditions

B the infill is made of injected polyurethane foam (PUR), ensuring significantly higher thermal insulation parameters than expanded polystyrene

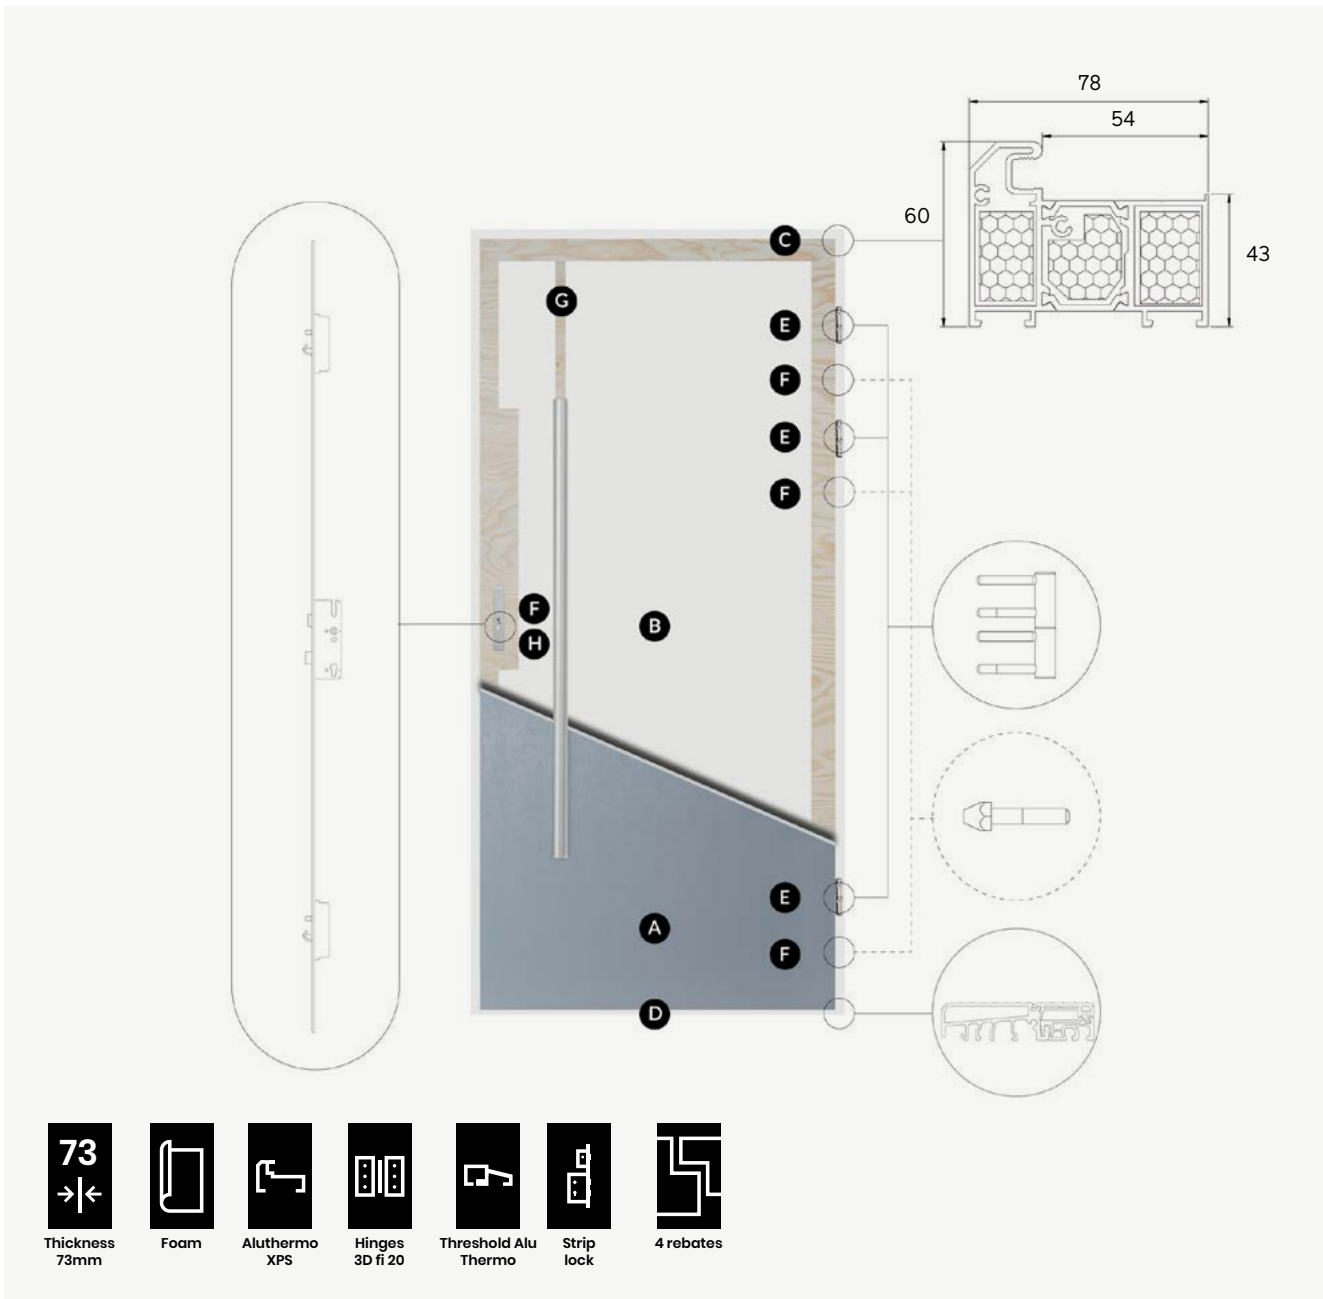

C aluminum frame filled with XPS

D Alu Thermo Roto commercial threshold (threshold height 19.6 mm)
- E** the door is equipped with three 3D hinges with a diameter of 20 mm, significantly facilitating their adjustment and their functionality

F the leaf is equipped with a strip lock with two independent cylinders, which provides the highest comfort of use, and with three interlocking bolts

G the door structure is based on a stile made of high-quality, waterproof, hardwood plywood – this ensures excellent mechanical stability of the door in changing weather conditions

H deadbolt adjustment
